## What is this product?

### Type

The Fund is a non-UCITS fund in accordance with the Finnish Act on Alternative Investment Fund Managers. It primarily invests in listed equities. The Fund is classified as an investment product in accordance with Article 8 of the EU's Sustainable Finance Disclosure Regulation (SFDR). The base currency of the Fund is the euro. The Fund has one unit share class (accumulation units).

### Term

The recommended investment period is five (5) years. The Fund does not have a maturity date. The Alternative Investment Fund Manager has the right to unilaterally redeem fund units without a redemption order in the cases specified in the Rules of the Fund. Fund units can be subscribed twice a month: on the 15th day of each month and on the last banking day of the month. Fund units can be redeemed once a month, on the last banking day of the month.

### Objectives

The fund primarily invests its assets in shares and equity-linked securities of small and medium-sized companies listed in Finland. The objective of the investment activity is to achieve the best possible long-term returns through active portfolio management, by diversifying the assets in accordance with the Rules of the Fund. The Fund promotes environmental and societal characteristics and takes sustainability risks and factors into account in the investment-making process. The Fund does not have a benchmark index. The Fund does not use significant leverage in its investment activities. However, the Fund Manager may temporarily obtain credit on behalf of the Fund for investment fund operations, up to an amount equivalent to a maximum of 10% of the Fund's net assets. The Fund does not distribute returns to unitholders. Instead, the returns generated by the investments are reinvested.

### Intended retail investor

The fund is suitable for individual investors who: 1) Want to invest in listed Finnish small and medium-sized company shares and equity-linked securities through a specialized investment fund. 2) Believe in the competitive return potential of Finnish small and medium-sized companies. 3) Understand that stock investments, and therefore the value of fund units, can significantly fluctuate. 4) Maintain a long-term perspective on their investments. 5) Trust the stock-picking expertise of Proprius Partners Oy's portfolio managers. 6) Understand the characteristics of specialized investment funds, such as limited subscription and redemption options. 7) Aim to invest responsibly by considering not only financial analysis but also factors related to the environment, society, and good governance in their investments. Investors should possess an adequate understanding of the fund as an investment vehicle and be prepared to bear the financial risks associated with the investment.

The annual report, the latest values of fund units and additional information about the Fund can be obtained online at [www.proprius.fi](http://www.proprius.fi) or directly from the Alternative Investment Fund Manager in Finnish, free of charge. The Fund's custodian is Skandinaviska Enskilda Banken AB (publ) Helsinki Branch.

### What are the risks and what could I get in return?

### Risk indicator

The risk indicator assumes that you keep the product for five years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact Proprius Partners Ltd's ability to pay investors. Risks that may not be fully accounted for by the risk indicator include: 1) operational risk, also known as the risk of loss resulting from the Alternative Investment Fund Manager's inadequate internal procedures, deficiencies related to individuals and systems, and external events, including legal and contractual risk; 2) sector and geographical risks, which refer to the risks that an unexpected event affecting an entire sector or geographical region may impact the overall performance of the sector and the financial instrument related to it, or the entire geographical area;

This product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay you what is owed, you could lose your entire investment.

### Performance scenarios

The figures shown include all the costs of the product itself. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average, and best performance of the suitable benchmark over the last 1 and 5 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. The stress scenario shows what you might get back in extreme market circumstances. This type of scenario occurred for the investment between February 2011 and February 2026.

### What happens if Proprius Partners Ltd is unable to pay out?

Insolvency of the Alternative Investment Fund Manager does not necessarily result in losses to you. The assets of the Fund are kept separate from the Alternative Investment Fund Manager's assets. The investment is not protected by any investor compensation or guarantee scheme.

### What are the costs?

#### Costs over time

### — PARTNERS —

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product performs. The amounts shown here are illustrations based on an example investment amount and different possible investment periods. We have assumed:

- In the first year, you would get back the amount that you invested (0% annual return). For the other holding periods, we have assumed the product performs as shown in the moderate scenario.
- EUR 10,000 invested

Costs over time	If you exit after 1 year	If you exit at the end of the recommended holding period (5 years)
Total costs €	255 €	1 011,68 €
Annual cost impact *	2,55 %	1,55 %

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period, your average return per year is projected to be 14.91% before costs and 13.36% after costs.

The fund uses a partial swing pricing method, which may be applied on valuation days when the fund's net subscriptions or redemptions exceed a predetermined threshold. In the case of net subscriptions, the value of the fund unit is adjusted upward using a swing factor, and in the case of net redemptions, the value of the fund unit is adjusted downward using a swing factor. More information about the swing pricing method is available in the fund prospectus and the fund rules at [www.proprius.fi](http://www.proprius.fi).

#### How long should I hold it and can I take my money out early?

The recommended holding period is a minimum of five (5) years. The recommended holding period is based on the Fund's risk and reward profile. Fund units can be redeemed once a month, on the last banking day of the month. The redemption notice must be submitted to the Alternative Investment Fund Manager no later than the 15th day of the month in order to be executed at the fund unit value of the last banking day of the same month. If the 15th day is not a banking day, redemption notice should be submitted on the banking day preceding the 15th day. The aforementioned costs are applied when fund units are redeemed. Your returns may be significantly smaller if you exit the investment before the recommended holding period. Your returns may vary significantly between different years.
